Address: _____

Serial Number: _____ Date: _____ Signature: _____

1. Quadrix Energy warrants that the product was free of any defect due to materials or workmanship at the time of installation.
2. We warrant that the installation complies with all current laws, bylaws, regulations, New Zealand Standards, building codes and Codes of Practice in force at the time of installation.
3. We further warrant:
 - The installation to be free from defects for a period of ONE year from the date of installation.
 - The vacuum tubes to be free of defects for a period of TEN years from the date of installation.
 - The Stainless Steel Tank and the supplied Stainless Steel supporting frame to be free from any defect causing leakage or corrosion for TWENTY years from the date of installation.

Warranty Conditions

1. Warranty is transferred to the next property owner and is not transferable to any other site.
2. All obligations and liabilities under this warranty are limited to repairing or replacing any component found to be defective.
3. The decision whether to repair or replace any item is at the sole discretion of Quadrix Energy and is subject to a field inspection by a, suitably qualified, company representative.
4. Quadrix Energy is not liable for any loss, defect or condition or damage expressly excluded hereunder.

Exclusions:

1. Defects caused by electrolytic or bacterial or corrosive conditions.
2. Damage including but not limited to misuse, abuse, neglect, unauthorised repair, war, fire, natural disaster, act of God, installation other than by a Quadrix Energy certified installer, improper application or improper use or operation of the tank.
3. Defects caused by the normal wear and tear of consumables such as elements and seals.
4. Interconnecting materials and fittings such as taps or valves used in the installation but not supplied by Quadrix Energy. Such products are subject to the separate warranties of their respective manufacturers.
5. Consequential or Contingent or other damages.
6. Tanks after 10 years will be pro-rated, based upon a 20-year life expectancy unless the tank has been fitted with an approved water filter, which has been properly maintained in accordance with the manufacturers instructions throughout its lifetime.
